

How to properly **care for** & **maintain** your **T4B** Battery

1. Charging

- ✗ **Do not** leave the battery charging for more than 12 hours
- ✗ **Avoid** fully draining the battery. Should it happen, recharge is as soon as possible.

2. Temperature

Batteries should be charged and stored in temperatures between **10-25C (50-75F)**. Keep your battery **out of direct sunlight** for prolonged periods of time and away from heaters when stored indoors. ✗

Avoid riding in temperatures below -20C (-4F). Extreme cold can also shorten the batteries life. ✗

3. Storage

- ✗ When storing your battery, **do not** leave it fully charged.
- ✗ Try to store the battery between **50-75%** charged.
